THE PROBLEM

Lex Fridman #400
2:47:32

Audio is the One Medium You Can't Skim

5M+ podcasts. Finding one insight means sitting through hours of audio. None of it is indexed, searchable, or structurally accessible.

"Did Lex say something about AGI in episode 350? Better listen to 3 hours."

Cross-Episode Intelligence Doesn't Exist

A guest across 12 shows over 4 years — their predictions, contradictions, and evolving views are siloed in isolated audio with no connective tissue.

"How has Sam Altman's view on AGI changed since 2021?"

Claim: unverified

Claims Have No Accountability Layer

Podcast guests make predictions and state facts — none of it is fact-checked. A claim from 2022 may be outdated, disputed, or outright false today.

"Who fact-checks a 3-hour conversation between two tech founders?"

WHAT PODCASTIQ DOES

► FOR EVERYONE

"Ask any question. Get a cited, fact-checked answer — instantly."

PodcastIQ is a conversational AI assistant that lets you search, question, and fact-check any podcast as if you had read every transcript. Search topics across 290+ episodes, compare speaker views, track opinion evolution over years, and verify any claim in real time. No more sitting through hours of audio to find one insight.

PRODUCT FEATURES

Semantic Episode Search

Search by meaning across 13,807 chunks via Cortex Search. Returns exact YouTube timestamp deep-links.

"What does Huberman say about morning sunlight?"

Knowledge Graph Q&A

Neo4j Cypher queries over 10,610 nodes. Answers relational questions pure vector search cannot.

"Who discussed AI safety most — and where?"

Temporal Opinion Tracking

243 evolution pairs detected, 144 CONTRADICTED. Surfaces opinion reversals between episodes years apart.

"How has Elon's view on AGI changed since 2021?"

Hybrid Fact-Checking

Two-stage verification: Cortex LLM pre-filter + Brave Search API. 65% API cost reduction.

"Fact-check: Sam Altman said GPT-5 launched in 2024."

Speaker Comparison

Fetch claims from two speakers on a shared topic. Synthesizes agreements, disagreements, and unique stances.

"Compare Sam Altman vs. Elon Musk on AI safety."

Smart Episode Discovery

Recommendations by guest, channel, or topic. Returns up to 10 episodes with YouTube deep-links.

"Find all episodes featuring Andrew Huberman."
